

IKES Member Pledge

on use of non-toxic ammunition and fishing tackle

The environmental and human health issues of lead is well known. Efforts to remove lead form the environment have been ongoing for many years. One of the last areas where lead is still being added to the environment is hunting and fishing activities. Ikes are leaders in the stewardship of the environment. The Breckenridge Chapter is a leader in the non-toxic ammunition efforts in Minnesota and authored the Minnesota Division Resolution 2011-04 to phase out lead in hunting and fishing.

The shift to non-toxic materials needs to start with the user and should not be done legislatively. That being said:

I, _____, as a Breckenridge Chapter member pledge to only use non-toxic ammunition and fishing tackle when participating in those activities. I also pledge to support and assist the Breckenridge Chapter to bring this pledge to the Minnesota Division and National IWLA.
